ABSTRACT

At the heart of the concept of ecological culture is the need to understand the consequences of these situations, to live in accordance with the laws of nature and society. Ecological culture is also an integral part of human culture, an important indicator of it. Without it, a person cannot be considered fully cultured and spiritual. This article discusses the importance of environmental culture in human life and personal activities in theory and practice

Keywords: Nature, ecology, ecological culture, ecological policy, environmental protection.
