ABSTRACT

At present, it is difficult to imagine the basis of the content of the dictionary without different terminological systems. When we look at the history of translation, in the scientific work that has taken place from past centuries to the present, experts have thought about the lexical, grammatical, stylistic, and many other pressing problems of experience. The main purpose of the study of terms is to replace and translate words from foreign languages into words that correspond exactly to our native language. Many of our scholars today are doing different research on this topic. This article also covers some aspects of terms and terminology.

Keywords: stylistic, semantics, cognitive, terminology, structure, semantic terminology, onomastic.
