THEORY AND METHODOLOGY FOR TEACHING VOLLEYBALL PLAYERS TO PLAY

Fozil Orazali ugli Atabekov
Senior teacher of the Chirchik State Pedagogical Institute, Uzbekistan

ABSTRACT

At present, the analysis of technical and tactical actions in the competitive activity of volleyball players is widely presented. For a long time, various variants of conditionally coded recording of games have been developed, which make it possible to record technical and tactical actions performed by volleyball players during the game.

Keywords: volleyball, methodology, theory, tactics, technique, activity, formation, development.
