IMPROVE THE TRAINING FUTURE PRE-SCHOOL TEACHERS

Lola Shukurovna Boliyeva
Teacher, Chirchik State Pedagogical Institute, Uzbekistan

ABSTRACT

In the mental development of children, classes on the development of elementary mathematical concepts are of great importance. The teacher must know not only how to teach preschoolers, but also what he teaches them, i.e. he must be clear about the mathematical essence of the ideas that he forms in children. In kindergarten, preschoolers are introduced to counting. Mathematical tasks and exercises teach children to think, think logically, expand their ideas about the environment.

Keywords: principle, preschool education, teaching principles, personality-oriented activity.
