TEACHING APPLIQUE FOR OLDER PRESCHOOL CHILDREN

Darmonjon Bozorboevna Mahmudova
PhD, Teacher of the Chirchik State Pedagogical Institute, Uzbekistan

ABSTRACT

Visual activity is of great importance in solving the problems of aesthetic education, since by its nature it is a literary activity. The specificity of art classes provides ample opportunities for learning about the beautiful, for developing an emotional and aesthetic attitude towards reality in children. Each type of visual activity, in addition to the general aesthetic influence, has its own specific effect on the child. The applique is of great importance for the teaching and education of preschool children. It contributes to the formation and development of many personal qualities of an individual, her mental and aesthetic capabilities.

Keywords: applique, activity, aesthetic education, individual, education of preschool children, pedagogical and psychological research.
