FORMS OF CONDUCTING AN ELECTRONIC LEARNING COURSE

Laziza Azam kizi Akhtamova
Master student of Bukhara Engineering-Technological Institute

ABSTRACT

This article will focus on the forms of creating and implementing e-learning courses used in the learning process. The problems of implementing e-learning courses in the educational process, solutions, and conclusions, as well as the advantages of using e-learning courses in modern education will be considered. Currently, during the COVID-19 pandemic, the need for e-learning courses for students has increased. The article analyzes the technical and psychological training of teachers and students to use e-learning courses, as well as the need to consider new opportunities for more effective use of educational electronic resources.

Keywords: education, e-learning courses, webinar, technologies, software.
