ABSTRACT

Teachers are one of the most influential and powerful resources for achieving equity, access and quality in education and are the key to sustainable global development. However, their training, recruitment, retention, status and working conditions remain a matter of concern. In effective school systems there is an understanding that the only the best way to improve results is to increase the quality of teaching. For this reason firstly pedagogical competence should be paid more attention by government and modern educationalists themselves. This article purposes to explore some ways of developing pedagogical competence of teachers in education.

Keywords: competence; professional competence of a teacher; competence-based methods.
