THE USE OF ICT IN PRE-SCHOOL EDUCATION

Salima Kuziboyevna Kholmatova
Teacher of Chirchik State Pedagogical Institute, Uzbekistan

ABSTRACT

The development of modern society is inextricably linked with scientific and technological progress. Information and communication technologies are firmly included in all spheres of human life; it also affects the educational process of preschool institutions. The main goal of the introduction of information and communication technologies (ICT) is to create a single information space of an educational institution, a system in which all participants in the educational process are involved and connected at the information level: administration, teachers, children and their parents.

Keywords: ICT, methodology, theory, technique, activity, formation, development, pre-school education.
