Examples; They are working to collect information about the early settlers in the region. The pumphlet provides a lot of information on the recent changes to thr tex laws. He gave the false information about his backgrounds. Teachers try to give true, scientific information to the students while teaching or delivering their lectures a definite scientific investigations, or a definit subject. First known use: 14the century. Synonyms: data, facts. At the end of the meaning and usage of the word it can be said that this word has limitless meanings. It depends on a field of usage. In pedagogics, it comprires very wide information, data, facts because the quantity of subjects in the University education is limitless. The more subjects, the more information. Becouse science is developing day by day. The teachers tasks are to use them in a perfect place and in a perfect time.

2. Communication – This word serves people. People communicate with each other by different ways. Communication is the product of speech of human beings.That's why language is the means of coomunication between peoples all over the world. If to look back to th history to the human speech development it will be clear that in the early peried of human formation people began to express their thoughts by using some body movements or some sounds. People could not talk at the beginning of human formation, as people could express or talk as human beings do at present .They might talk with the help of some jests, mimes, eyes , and other parts of their bodies. Human beings first began to pronounce sounds, words, combinations of words, short sentences and phrases. Until the formation of sentences thousands of years might have passed.

RESULTS AND DISCUSSION

At present the content and meaning of communication are widely being described. Below the following explanations are given:
