ABSTRACT

Today, in the era of globalism and spiritual ideological threats of the 21st century, raising the spiritual potential of young people is more important than ever. The importance of spiritual and educational work in the formation of the spiritual potential of young people in this process is incomparable. It is necessary to start carrying out spiritual and educational work from the lowest level. That is, pre-school education, starting in general secondary educational institutions would have made the result more effective.

Keywords: spirituality, enlightenment, spiritual and educational work, propaganda, efficiency, enlightenment.
