ABSTRACT

This article is devoted to helping to gain a better understanding of English social media neologisms. To be more precise, it analyses word-formation of neologisms and gives possible translations for them in the Uzbek language. It is said that it is one of the most important topics to be studied and researched in linguistics [3].This article demonstrates lexical translational peculiarities of English and Uzbek neologisms.

Keywords: morpheme, derivation, blending, coinage, conversion, compounding.
