ANNOTATSIYA

Ushbu maqolada keyingi yillarda juda ahamiyat qaratilayotgan fanlararo integratsiya muammosi, ya`ni geometriya va differensial tenglamlar orasida integratsiyaga qaratilgan. Geometrik masalalarni differensial tenglamar yordamida yechishga doir bir nechta misollar keltirilgan.

Kalit so'zlar: integratsiya, urinma, differensial tenglama, burchak, geometriya.

APPLICATION OF LIMITED CHAIN FACTS TO SOME ISSUES

ABSTRACT

This paper focuses on the problem of interdisciplinary integration, which has become very important in recent years, i.e. integration between geometry and differential equations. Here are some examples of solving geometric problems using differential equations.

Keywords: integration, experiment, differential equation, angle, geometry.
