ANNOTATSIYA

Hammamizga malumki geometrik masalalarni yechishda o‘quvchilardan kengroq va asosan ijodiy yondoshuv talab etiladi. Ko‘pgina masalalarni ishlash jarayonida o‘quvchilardan nafaqat formula va qoidalarni bilishlari balki ularni qo‘yilgan masalaga tadbiq eta olishlari ham muxim omil hisoblanadi. Bu maqolada bir nechta manashunday geometrik masalalarni yechish usuli bilan tanishamiz.

Kalit so‘zlar: kombinator, tekislik, to‘g‘ri chiziq, aylana, geometriya aksiomalari, uchburchak, to‘rtburchak.

ABSTRACT

We all know that solving geometric problems requires a broader and more creative approach from students. In the process of working on many problems, it is important that students not only know the formulas and rules, but also apply them to the problem. In this article, we will look at a way to solve several such geometric problems.

Keywords: combiner, plane, straight line, circle, geometric axioms, triangle, rectangle.
